Environmental Management Policy

Carfax Commercial Constructions is committed to the protection and enhancement of the environment. It is our policy to address environmental issues and comply with relevant environmental legislation and regulations. We employ socially acceptable and cost-effective strategies to mitigate threats to the environment and provide protection to clients, the general public, and the organisation's staff.

We plan our work and utilise our products and materials in such a way as to minimise environmental impacts in production, use, and disposal.

We take an active interest in the prevention of pollution through the adoption of processes, practices, materials, equipment and products that avoid, reduce, or control pollution relevant to the context of our organisation.

Our commitment to continuous improvement is demonstrated by our adoption of the Management System Standard ISO 14001, whereby our Management System ensures that we set and review environmental objectives and targets.

All our staff and subcontractors are educated with regard to the practical application of our Environmental Policy, which is openly available to the public.

This Environmental Management Policy is available to relevant interested parties upon request, and can be viewed on the Company website (www.carfax.com.au).
